About Me

My name is Yakeen Osmani. I was born on January the 26th, the year 1977 in Guwahati. I have been married since 2008.

I am a student-at-heart. For me, learning is a never-ending experience. I learn and I deliver in a constant never-ending-loop.

I am passionate about art in digital designs. For me, it is an art-form... a means to express myself. I love designing User Interfaces (desktop, web, mobile UI) that gives a unique user experience(UX) and yet which is very simple and intuitive at the same time.

When it comes to executable apps, I love designing non-rectangular window-based, very different looking application designs that gives the user an eye-candy experience and a very unique look-and-feel. I love experimenting with modern design concepts and implementing the same wherever there is an opportunity.

My creativity is what makes me unique.

My Resume'

UI + UX + Web + Graphics Designer
